

(Somewhat) Guilty Pleasure Series: **Let's Go Shopping!**

Shall we window shop on the web together?

Patient library staff take us for a spin around sites like Amazon, eBay, Craigslist, local stores, SFPL's subscription to Consumer Reports and Bay Area Consumer Checkbook, while sharing tips for being a savvy and safe online shopper.

Some Basic Online Tips

- § Be **miserly about sharing your personal information**.
- § Only make purchases or transmit confidential information from websites that you are sure are **legitimate, the address is typed correctly**, and have a **green padlock icon and https** in the address/URL.  <https://sfpl.org>
- § Be **careful of clicking links** in emails and websites. Rest the cursor over a link to **check the actual address** – you may be surprised, perhaps dismayed. It is generally better to type in an address directly (and accurately of course) or possibly use a link from a successful Google search. Create bookmarks / favorites for shopping and financial sites you use often.
- § **Don't download software unless you are certain it is legitimate and useful**. There is a lot of dubious, destructive, and downright dastardly software out there. Leave it out there, even if it sounds enticing.
- § Use **tricky to figure out passwords. Don't use the same password** for all accounts. **Update** them regularly. **Don't forget** them.
- § Consider using **password manager** software (but don't forget the password to that service). [LastPass](#) is a popular program that offers a free version.
- § Make sure that you **fully log out** from sites, close the browser, and possibly restart the machine when using a public or shared computer.
- § Use **Incognito / Private Browsing** modes if you would like your browsing history, etc. deleted when done with a session.
- § EFF ([Electronic Frontier Foundation](#)) has a great deal of information on privacy and security issues. They also have a free browser plug-in called Privacy Badger which can help **prevent sites from tracking you** when online.
- § Be **wary** of the seductive world of **consumerism**. Pause and consider if you really need (and can afford) an item before you click that buy button.
- § Is it an item that you can **borrow from friends, family, library**, etc.?
- § Is it something that you can **purchase locally**? Do you want to support local shops, spend time with others, and cut down on shipping materials, fuel, etc.?
- § Factor in **shipping costs** to the final price.
- § What is the **return policy**? Is there a restocking fee?
- § Will someone be available to **accept delivery** of the item?
- § If purchasing a used item, are you seeing a **photo of the actual item**?

Some SFPL / sfpl.org Shopping Resources
